**DETAILED ACTION*****Allowable Subject Matter***

1. Claims 1-8 and 10-31 respectively renumbered 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Wu et al (US 5,615,018) in view of Lane et al (US 5,377,051) discloses a method for controlling intelligent fast forward video system. It is disclosed by Wu the ability to calculating complexity of a video story development based on motion information by sequentially indexing an entire video (Column 4 Lines 14-24); determining a play speed using the calculated motion-based complexity (Column 5 Lines 1-25); and a variably controlling the play speed of the video based on the determined play speed (Column 6 Lines 1-48). It is further taught by Lane et al the use of a digital video recorder that has trick play image enhancement as seen in Figure 12d. The trick play mode also provides each coefficient to be divided by a weighted factor that is determined on scene complexity, and perceptual characteristics. However, the prior art of record fails to disclose, suggest, or teach the following limitation as recited in independent Claim 1:

**"wherein the complexity is defined based on additional information on a length of shot segment, wherein the complexity is defined as simple in a case that a length of a shot segment is long and the complexity is defined as more complicated in a case that shots having short shot segments consecutively appear."**

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
